**AMENDMENT**

Sir:

In response to the Official Action of July 25, 2003, the claims in the application are as follows:

**CLAIMS:**

Claims 1-~~24~~<sup>25</sup> have been cancelled.

25. A method of constructing a building unit module having two pairs of opposing sides, a roof and a floor,

the method comprising forming at least three substantially similar plural rectangular frame members, positioning the frame members vertically in an aligned row one with the other with a spacing between each adjacent pair of frame members, connecting a plurality of horizontal runners to the frame members with the horizontal runners parallel to each other, extending along one pair of said two pairs of sides with a spacing between each adjacent pair of runners to form a lattice framework, whereby loads on the module are distributed substantially equally throughout the framework, securing horizontal angle members to the internal corners of the lattice framework, and securing sheeting to the lattice framework via the runners so as to form an enclosure.

26. A method as claimed in claim 25, wherein said enclosure has four external corners additionally comprising securing horizontal angle members to the four external corners of the lattice framework.
